DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-7, drawn to a wind energy power generating system with an asynchronous generator and a super-synchronous converter.

II. Claims 8-16, drawn to a method for regulating power output of a generator where slip power is fed into power network.

2. The inventions are distinct, each from the other because of the following reasons: Inventions of Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, functions and effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Mr. Frederick J. Dorchak (Reg. No. 29,298) a written election/restriction requirement was requested.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined indicating a statement if it is done with or without traverse (37 CFR 1.143).
